## Serial No.....

## APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Dat	te of filing in State Engineer's Office		
FEB 9 1994			
Returned to applicant for correction			
Con	rrected application filed. APR 8 1994 Map filed APR 8 1994 under 59421		
	WestPac Utilities, a Division of Sierra Pacific Power Company		
	The applicant		
Ρ.	O. Box 30028 Reno Street and No. or P.O. Box No. City or Town		
Married To 00000 0000			
	State and Zip Code No. hereby make application for permission to change the point of Diversion, Place of Use of a portion		
	Point of diversion, manner of use, and/or place of use		
of v	water heretofore appropriated under Identify existing right by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree and		
	identity existing right by Ferrint, Certificate, Froot of Claim Nos. If Decreed, give this of Decree and		
ident	ify right in Decree.		
1.	The source of water is		
2	0.091 cfs - 65.82 ac.ft./an.		
۷.	Municipal and Domestic		
	The water to be used for		
4.	The water heretofore permitted for Municipal and Domestic    Irrigation, power, mining, industrial, etc. If for stock state number and kind of animals.		
5	The water is to be diverted at the following point within the NW4 NW4 of Section 30, T19N, R19E,  Describe as being within a 40-acre subdivision of public survey and by course and		
٥.			
	M.D.M., or at point from which the NW corner of Section 19, T19N, R,19E, MDM, bear distance to a section corner. If on unsurveyed land, it should be stated.		
	N 10°52'43" W 5971.92 feet.		
6. The existing permitted point of diversion is located within. Lot 7(SW\frac{1}{2} NW\frac{1}{4}) of Section 7, If point of diversion is not changed, do not ans MDM from which the W\frac{1}{4} corner of said Section 7 bears S 02°13'08" W 894.			
7.	Proposed place of use. The certificated water service area of Sierra Pacific Power		
	Describe by legal subdivisions. If for irrigation state number of acres to be irrigated.		
	Company as described in the legal description and shown on the map on file with		
	the State Engineer's Office, Division of Water Resources		
8.	Existing place of use Within Sections 4, 5, 6, N1 and SE1 Section 8, Section 9,		
	Describe by legal subdivisions. If permit is for irrigation, state number of acres irrigated. If changing place of use and/or		
	manner of use of irrigation permit, describe acreage to be removed from irrigation.		
9.	Use will be from January 1 to December 31 of each year.  Month and Day Month and Day		
	Month and Day  Month and Day  Month and Day  December 31  Of each year		
10.	Use was permitted from January 1 to December 31 of each year.  Month and Day Month and Day		
11.	Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and		
	specifications of your diversion or storage works.) Water will be diverted from a drilled and  State manner in which water is to be diverted, i.e. diversion structure.		
	cased well to existing  State manner in which water is to be diverted, i.e. diversion structure, company facilities, treated, and placed into the existing distribution system		
	ditches, pipes and flumes, or drilled well, etc.		
12.	Estimated cost of works Approximately \$ 100,000.00		
13.	Estimated time required to construct works 2 years		

14. Estimated time required to complete the appli	ication of water to beneficial use
• • •	stock watering, state number and type of units to be served or annual
consumptive use:	,

AMENDED APPLICATION FOR PERMISSION TO CHANGE THE POINT OF DIVERSION AND PLACE OF USE OF A PORTION OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED BY WESTPAC UTILITIES, A DIVISION OF SIERRA PACIFIC POWER COMPANY ("Sierra Pacific")

## ITEM NO. 15 - REMARKS:

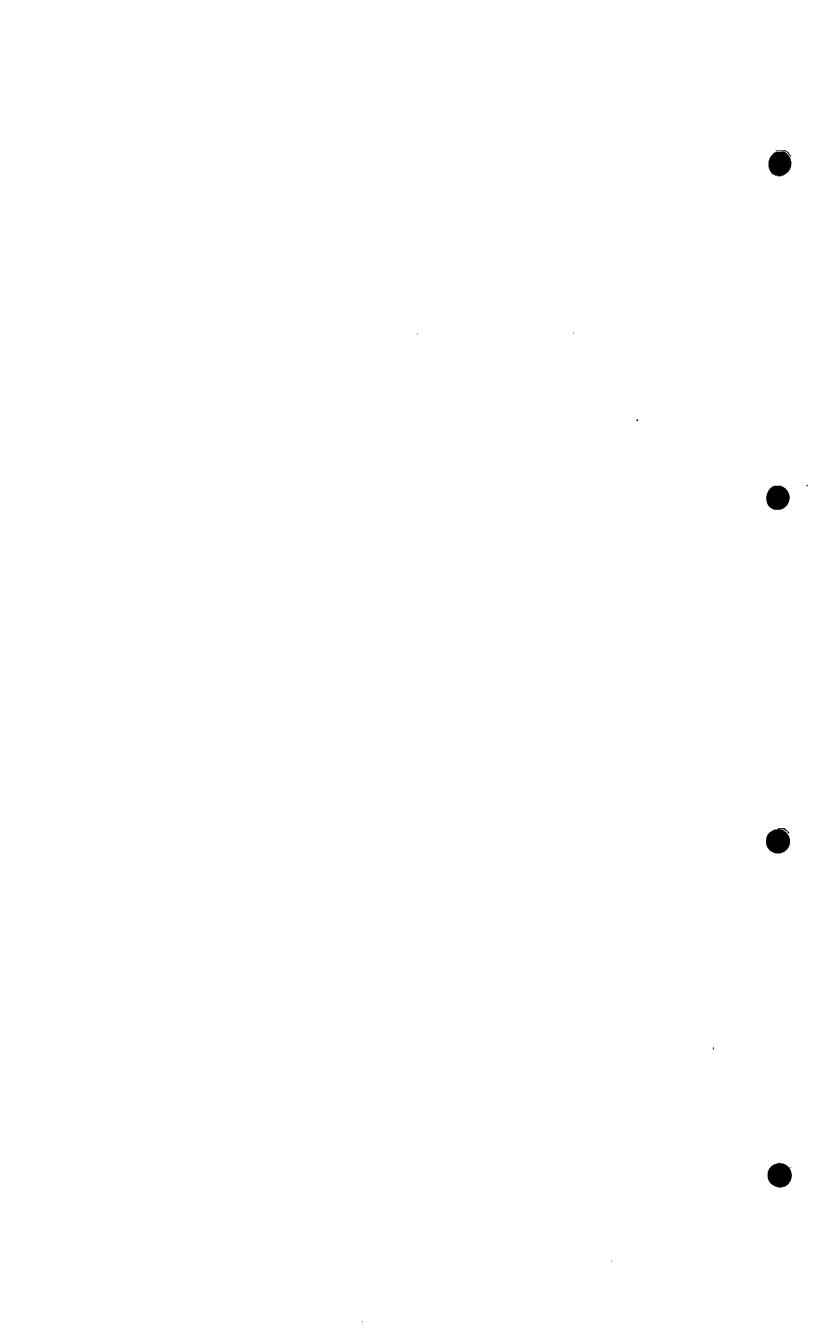

Sierra Pacific intends to develop municipal production wells within the areas defined by Applications to Change No.s <u>59421</u> through <u>59542</u>. The water developed will be provided to existing and new customers within present and future service areas of Sierra Pacific. The proposed source of water is the fractured bedrock aquifers. The total combined duty of Applications to Change No.s <u>59421</u> through <u>59542</u> is <u>10,077</u> acre feet annually.

The proposed total combined duty of 10,077 acre feet, Applications to Change No.s 59421 through 59542, is intended to be in addition to Sierra Pacific's "Administrative Capped" groundwater rights and its acquired groundwater rights. Short term and long term limits to the Truckee Meadows groundwater rights currently subject to the State Engineer's "Administrative Cap" should not be impacted by these applications. By filing the above Applications to Change, Sierra Pacific proposes to divert groundwater from the fractured bedrock aquifers which are resources distinct from the aquifers which are subject to present and future administrative "caps", but not to exceed the certified right of the respective water rights.

Applications to Change No.s <u>59499</u> through <u>59507</u> propose to move the point of diversion and place of use of water allocated under Permit No. <u>26193</u> (Certificate No. <u>8939</u>). The total combined duty of Applications to Change No.s <u>59499</u> through <u>59507</u> is <u>592</u> acre feet annually.

Applications to Change No.s <u>59499</u> through <u>59507</u> are part of a larger group of applications, Applications to Change No.s <u>59499</u> through <u>59542</u> (the "Hunter Creek Applications"). The Hunter Creek Applications have been filed in the Hunter Creek bedrock aquifer target area in order to transfer a total combined duty of <u>3,301</u> acre feet annually. Based on the assumption that a municipal production well in this target area will produce 800 gallons per minute or more, a total of four to six production wells in this target area may be required to provide <u>3,301</u> acre feet annually.

The Applicant plans to locate these four to six production well sites by filing applications for waivers in accordance with NRS § 534.050(2). After the four to six production well sites are located in the target area, the Applicant intends to file new Change Applications to change the point of diversion and place of use of water from Permit No. 26193 (Certificate No. 8939) to one

REMARKS CONTINUED:

of the newly located production well sites (the "New Applications").

Water transferred under these New Applications will be replaced by water transferred under Change Application No. 59585 (the "Replacement Application"). Water transferred under the Replacement Application will be based on Permit No. 20371 (Certificate No. 6116).

The New Applications will be conditioned on the simultaneous approval of the corresponding Replacement Application. To the extent that some but not all of the New Applications are approved and/or denied, it is the Applicant's intent that the amount of water ultimately transferred under the New Applications be approximately equal to the amount of water transferred by the corresponding Replacement Application, and vice versa. The Applicant intends that the ultimate approval of the New Applications and the corresponding Replacement Application be expressly conditioned on their simultaneous approval.
